

Kim Controls is proud to work in partnership with Pro-face America, a leading global supplier of innovative industrial automation solutions. Principal products include PC-based, open architecture, visualization and control offerings. The need for information, from the corporate office to the plant floor, is driving the growth of today's open architecture systems, and Pro-face products give you the information tools you need.

AGP Highlights:

- Factory floor black box offers event recorder that will capture video preceding and after trigger events, allowing you to fix the cause of phantom failures, and remote event diagnosis.
- Multi-language support plays audio alerts in multiple languages and offers multi-language screen display for multi-lingual work force.
- Image capture and video input can be used for shipment verification records, inspection system sampling, security monitoring and monitoring machine performance inside a safety barrier.

The only HMI you need.

With the AGP 3000's extensive array of connectivity options, it's the only HMI you need.

Shouldn't you be sure that your HMI solution is compatible with all of your systems, today and in the future?

Call Kim Controls and let us demonstrate the compatibility and versatility offered by Pro-Face®, and open a new world of HMI possibilities!

AGP3000 Multimedia Series:

A whole new world of possibilities for HMI developers

Perform fast and accurate troubleshooting with **Event Recorder.**

- Record the events leading to machine breakdown, and analyze the video to pinpoint problems.

Create online audio/video machine tutorials with **Movie Playback.**

- Use the AGP 3000 to play on-site instructional videos, helping you keep operators trained on latest procedures.

Enhance communication with **Audio Recording and Playback.**

- Leave audio messages or instructions for the next shift operator right on the AGP 3000.

Use video cameras for remote monitoring and troubleshooting of machines with the:

Video Mix Unit Option.

- Also use the movie converter software for instructor-type maintenance procedures.

Enhance your operator interface experience with the AGP 3000 Multimedia Series.
